Our Aim is to provide the unmatchable stander to the field of malls/multiplex/residential where rather then living or shopping people feel the essence of the property and enjoy the bliss of our world class services.
The phrase shopping mall consists of two words, shopping and mall. A shopping mall is basically a shopping complex or a market place. But then a bazaar is also a market place. There is a difference between a shopping mall and a bazaar. A bazaar is a linear concept. It consists of generally a long road or a street, running along the city, usually in its center, with big and small shops on both its sides. The road or the street may be a busy traffic road with pedestrians and all kinds of vehicles running and even honking upon it.

A shopping mall ideally is not part of the road side bazaar, though there may be exceptions. It is an enclosed and independent shopping complex or an arcade with a specified space for parking of cars and other vehicles. Shopping malls are, in some cases, located away from the busy streets of the city. They are located either on its suburbs or a few minutes drive away from the city. The reason may possibly be the shortage of space inside the city, because a shopping mall is usually a complex of huge and spacious buildings.

But why the word ‘mall’ instead of ‘complex’ or a ‘centre’? Is it because ‘mall’ is a more ‘in’, a fashionable word, and a hep expression? The answer is both yes and no. The word ‘shopping’ appears to have been attached to ‘mall’ to take advantage of the pleasant connotations that the word ‘mall’ is associated with.
What is a shopping mall? According to Preeminent

For Peoples: - A destination where people can enjoy & celebrate their dreams & feel like celebrity.

For Retailers: - A destination where retailers can able to fulfill their dreams & feel honor to serve common peoples.

For Developer: - A property where which make prideful to developer.
Management in all business and organizational activities is the act of getting people together to accomplish desired goals and objectives using available resources efficiently and effectively. Management comprises planning, organizing, staffing, leading or directing, and controlling an organization (a group of one or more people or entities) or effort for the purpose of accomplishing a goal. Resourcing encompasses the deployment and manipulation of human resources, financial resources, technological resources and natural resources. Since organizations can be viewed as systems, management can also be defined as human action, including design, to facilitate the production of useful outcomes from a system. This view opens the opportunity to 'manage' oneself, a pre-requisite to attempting to manage others.
Management? According to Preeminent

The process of work which makes every thing (relations-business-image-attitude) Perfect.

And peoples sayyyyyy wow, awesome.....
